Solution #1: Powdered Eggs

Alison's Pantry offers a nice selection of food storage products to help you build a long-term supply in 2010. Powdered Eggs (#1111) are one great example! They are simple to use and they provide the least expensive source of high-quality protein. To use them in your baking, just add the egg powder with the dry ingredients and the necessary water to the liquid ingredients in your favorite recipes. Powdered eggs are less messy, very convenient, and often more economical than fresh eggs! *Call me if you'd like to add powdered eggs to your next order. I can also give you a free powdered egg conversion chart to make it even easier to use them in your baking.*
